

Pumpkin Patch Math

Materials:

- Dice
- Small pumpkins or any kind of counters (candy corn, buttons, or pom-poms). Paper pumpkins to print and cut if desired are at the end of the materials.
- A patch for players' pumpkins. Download and print ours or make your own.

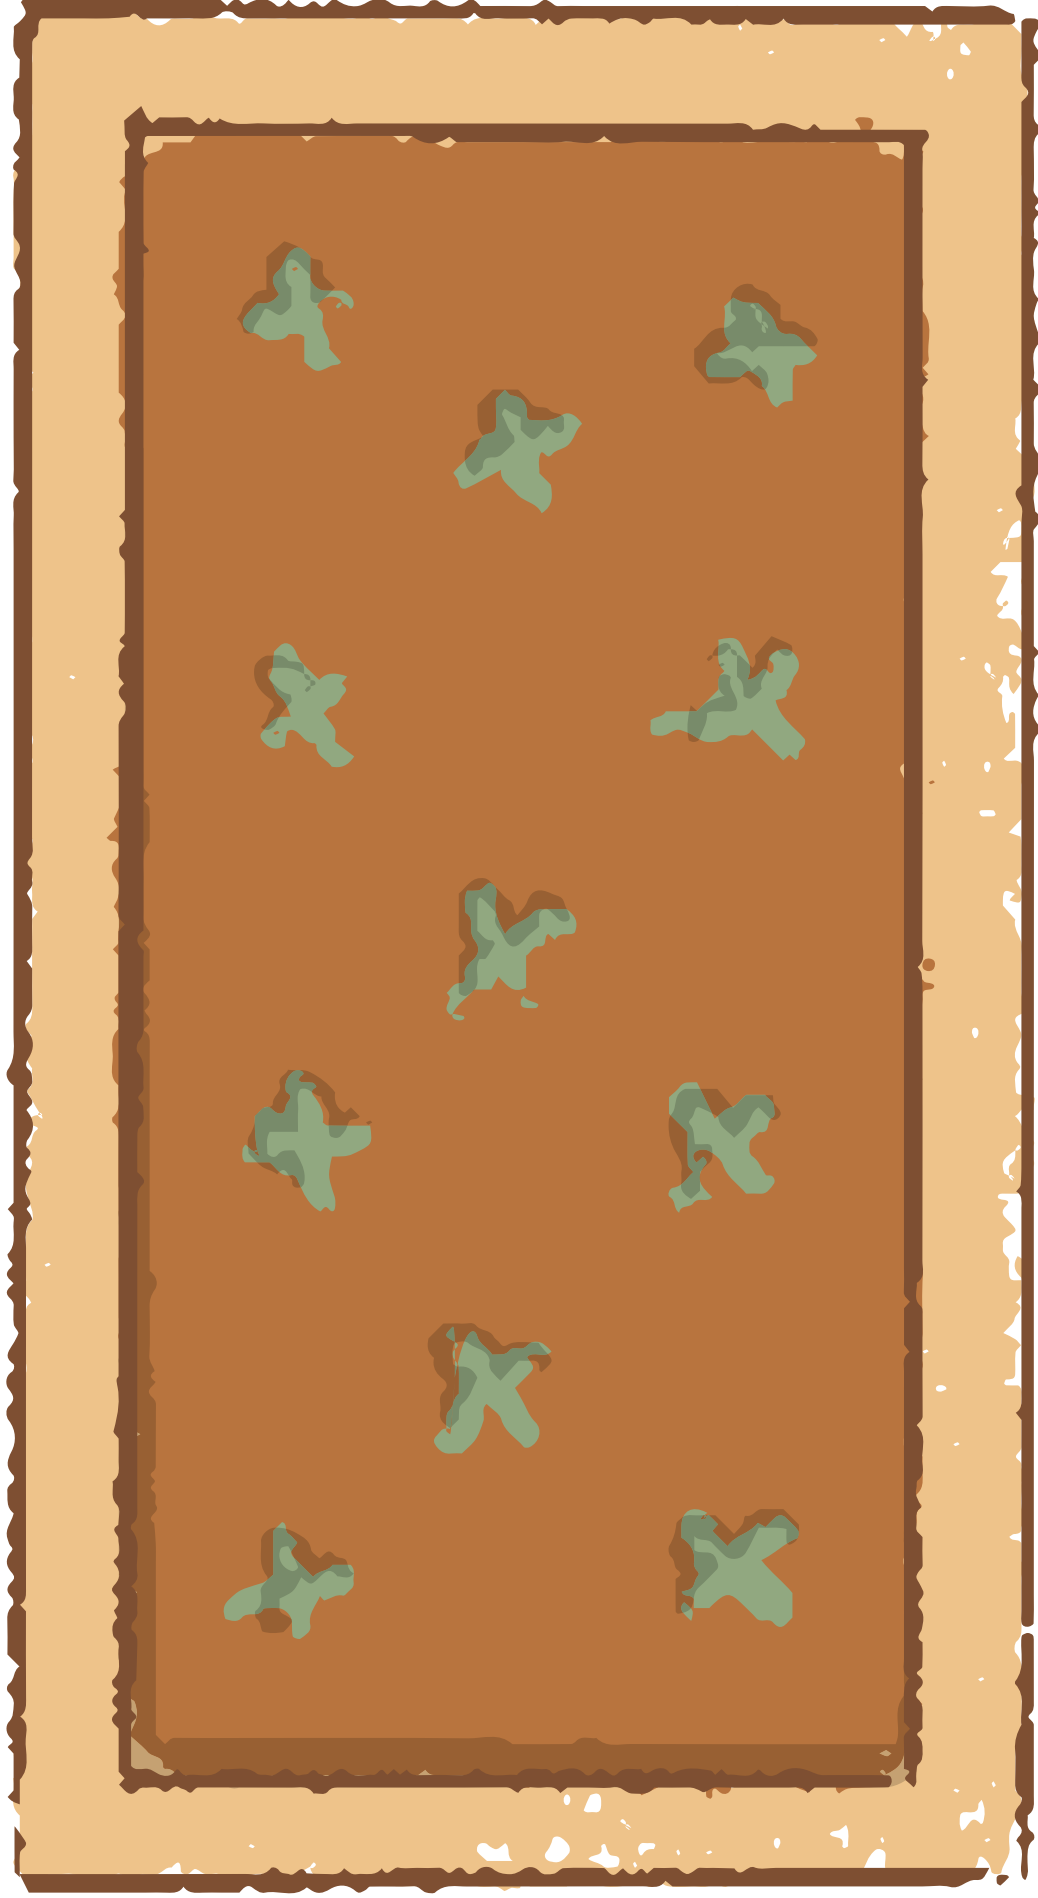

How to Play:

1. Each player rolls two dice and places that many pumpkins in their patch.
2. Roll again and add that many more pumpkins to your patch.
3. The first player to reach a target number (like 20) wins!

Variations:

- For younger children: Roll one die at a time and count pumpkins as you add.
- Optional Subtraction: After practicing addition, challenge kids to start with 20 pumpkins and “take away” pumpkins on based on what they roll
- If your child is ready for multiplication, they can also multiply the numbers on the two dice and place that number of pumpkins in their patch
